Links do funil — para uso

Todas as URLs do projeto com o domínio de produção já aplicado.

Domínio: **https://my-money-rz30.onrender.com** · Gerado em: **07/11/2026**

> **Como usar.** Os links de **entrada** são a raiz de cada funil — as subrotas existem, mas abrem sem estado. Os checkouts ficam em `go.centerpag.com` e são o destino de cobrança. Parâmetros de rastreio aceitos: `sck`, `xcod`, `utm_source`, `utm_medium`, `utm_campaign`, `utm_content`, `utm_term`.

10. Pendências antes de rodar tráfego

PV14 cobra preço diferente do exibido. A tela mostra $27 (`components/pv14/call.tsx:445`) e o CTA envia `PPU38CQFUFH` (valor configurado no CenterPag, hoje $29,90).

Domínio configurado. `SITE_URL` fica em `lib/site.ts` com o fallback `https://my-money-rz30.onrender.com`. Sobrescreva com `NEXT_PUBLIC_SITE_URL` em preview, sem editar código.

Lista branca de hosts. Só CenterPag, Hotmart, Rise AI Club, Grow AI Club e Transit Club passam pelo redirector. Processador novo exige atualizar `components/redirector.tsx:15`.

`upsell=true` inconsistente. Usado em up1, up2, up3 e `/back`; ausente no quiz e nas VSLs. Se o processador usa esse parâmetro, dois caminhos ficam fora.

URLs montadas a partir das rotas reais do App Router e das constantes de `lib/funnel.ts`. A conferência final de valor cobrado é sempre do lado do CenterPag.
